Research Focus

I am a human-computer interaction (HCI) researcher interested in responsible, human-centered artificial intelligence (AI). Through my work, I seek to embed the public's perceptions and opinions of consequential AI systems into debates concerning their real-world ethical, social, and legal implications. My overarching objective is to ensure that the development and governance of AI reflect the values, expectations, and opinions of the people who use and are affected by these systems.

Education

Max Planck Institute for Security and Privacy (MPI-SP)

Ph.D. in Computer Science (Advisor: Yixin Zou) — *Sep. 2023–Feb. 2027 (Expected)*

Korea Advanced Institute of Science and Technology (KAIST)

M.Sc. in Computer Science (Advisor: Meeyoung Cha) — *Mar. 2021–Feb. 2023*

B.Sc. in Computer Science (with honors) — *Mar. 2017–Feb. 2021*

Publications

Conferences are the primary publication venues for computer science/human-computer interaction (CS/HCI) research. Thus, the majority of my research is published in CS/HCI conference proceedings.

* *denotes co-first authorship.*
